

AMENDMENTS TO THE SPECIFICATION

Please amend the third paragraph on Page 2 of the patent application as follows:

This object is achieved according to the invention, which provides, in one aspect, an electromagnetic field deflecting garment, comprising:

a conducting fabric edged with a lattice fabric;

an electronic circuit operably interconnected to said conducting fabric and said lattice fabric to form a closed circuit, wherein said electronic circuit is operable to dispel an electromagnetic signal received at said garment through a Joule effect.
